Work Experience

FlickHit

Jul 2026 – Sep 2026

Product Engineering Intern (Platform & Growth)

- Reduced AI video-processing time by **25–33%**, from **15–20 minutes to 10–15 minutes**, by optimizing worker execution, integrating Klap, and eliminating unnecessary media handoffs.
- Raised scheduled-post publishing success from approximately **50% to 99%**, reducing failures by **98%** through a dedicated publishing worker, retry controls, persisted upload recovery, and failure-aware execution logic.
- Productionized publishing across **4 social platforms**—YouTube, Instagram, Facebook, and X—and validated reliability through **100+ scheduling tests** covering OAuth, retries, cancellation, and recovery flows.
- Deployed **3 cloud workloads**—API service, processing worker, and publishing worker—using Cloud Run/Jobs, GCS, Cloud Tasks, PostgreSQL, and GitHub Actions CI/CD while coordinating delivery across a **3-person engineering team**.

AIPlaneTech Pvt. Ltd.

Jun 2025 – Jul 2025

AI Engineer Trainee

- Engineered AI Insight Pro, an enterprise AI governance platform integrating **7+ data sources** for automated discovery, sensitive-data classification, metadata extraction, and compliance analysis.
- Improved personally identifiable information (PII) detection accuracy from **60% to 80%** by replacing regex-only matching with a hybrid large language model and rule-based classification pipeline.
- Architected asynchronous backend services using **Python, FastAPI, and PostgreSQL** and deployed **2 production AI agents** across **5+ enterprise governance workflows**.

Projects

Issuenix – Digital Credential SaaS Platform | FastAPI, PostgreSQL, React

Live | 2025

- Launched a full-stack SaaS platform enabling organizations to issue, manage, distribute, and verify tamper-resistant digital credentials.
- Automated bulk certificate generation and email delivery through asynchronous FastAPI workflows, reducing manual processing time by **99%+**.
- Enabled sub-second certificate verification using indexed PostgreSQL queries, REST APIs, authentication, and organization-level management workflows.

NoniRecruiter – AI Recruiting Platform | React, TypeScript, Backend APIs

Live | 2026

- Developed an end-to-end recruiting workflow for managing candidates, job requirements, and AI-assisted evaluation through a responsive product interface.
- Integrated frontend workflows with backend APIs for candidate data processing, search, filtering, and recruiter-facing actions.
- Designed reusable product components and application state flows for multi-step recruiting operations and structured candidate review.

KAIROS – Engineering Memory Platform for AI Agents | Python, FastAPI, PostgreSQL, React

Live | 2026

- Engineered a persistent engineering knowledge layer that ingests GitHub, Jira, Slack, documentation, and codebase context for developer and AI-agent workflows.
- Built asynchronous FastAPI services and semantic retrieval over PostgreSQL/vector storage to surface historical decisions, implementation context, and engineering knowledge.
- Established production-style testing and CI workflows spanning unit, integration, API, and end-to-end validation.

Technical Skills

Languages: Python, JavaScript, TypeScript, SQL, C++

Frontend: React, TypeScript, HTML, CSS, Responsive UI, State Management

Backend: FastAPI, REST APIs, WebSockets, Async Programming, Authentication, OAuth, API Integration

Databases: PostgreSQL, SQLite, Supabase, Vector Databases

Cloud & DevOps: GCP, Cloud Run, Cloud Tasks, GCS, Docker, GitHub Actions, CI/CD, Git, Linux

AI: LLMs, AI Agents, RAG, Embeddings, Semantic Search, LiteLLM

Achievements and Leadership

- Ranked 29th nationwide in IIT Bombay's National Entrepreneurship Challenge 2025.
- Advanced to Round 2 of the Polaris Fellowship selection process.
- Published 6+ technical articles on artificial intelligence and machine learning, receiving 3,000+ views and 1,500+ reads.
- Solved 400+ data structures and algorithms problems across LeetCode and other coding platforms.
- Served as Tech Lead at Kaizen, mentoring students in AI systems, backend engineering, and software development.

Education

MBM University, Jodhpur

Bachelor of Engineering in Computer Science and Engineering

2023 – 2027

Jodhpur, Rajasthan
